

CASUAL CLASSIC & LINEN-LOOK

C A R E G U I D E

Vacuum with a soft brush attachment to remove loose debris.

To remove everyday stains, such as dirt and spills, use a soap and water solution.

For tougher stains, such as red wine or marker, use a bleach and water solution.

As an additional measure of safety, complete the cleaning with an at-home disinfectant spray such as Lysol or Clorox

GENERAL CLEANING FOR OYSTER CREEK COLLECTION PERFORMANCE FABRIC

- Because dust and dirt cause fabric to wear faster, we recommend vacuuming regularly with an upholstery attachment.
- Flip, rotate and fluff removable cushions regularly to ensure even wear and increase longevity.
- An annual professional cleaning will keep your upholstered furniture looking its best.
- Maintenance requires promptly treating spots and stains and should include routine, on-going care which reduces soil build-up on a fabric's surface.
- Do not rub or brush excessively as you may cause fuzzing.

SPOT CLEANING WITH SOAP AND WATER FOR EVERYDAY MESSAGES

The spot cleaning method of stain removal can be used for most light to medium stains.

1. Before spot cleaning, blot up liquids on the surface with a clean, soft towel and brush off any loose dirt.
2. Prepare a cleaning solution of 1/4 tsp mild, enzyme detergent, such as standard dishwashing liquid, per 1 cup of lukewarm water.
3. Apply the cleaning solution using a misting spray bottle.
4. Work the solution into the affected area by lightly scrubbing the area with a sponge or soft bristle brush. Make sure to work from the outside of the stain inward so as not to spread the stain and rinse your sponge or brush frequently.
5. Allow the cleaning solution to soak into the fabric.
6. Rinse thoroughly to remove all soap residues, as residues will attract dirt. Blot excess moisture with a clean, soft towel or sponge.
7. Repeat steps 3 - 6 as needed.
8. Allow fabric to air dry.

SPOT CLEANING WITH BLEACH FOR STUBBORN OR EXCESSIVE STAINS

1. Remove any loose debris and blot the stain.
2. Prepare a bleach based cleaning solution. Bleach should be diluted with water on a 1:10 ratio (1 part bleach, 10 parts water).
3. Apply the bleach based cleaning solution using a misting spray bottle and allow for the solution to soak into the fabric.
4. Work the solution into the affected area by lightly scrubbing the area with a sponge or soft bristle brush. Make sure to work from the outside of the stain inward so as not to spread the stain and rinse your sponge or brush frequently.
5. Blot and thoroughly rinse the fabric with water until the stain is cleaned.
Make sure that all the bleach is rinsed off of the surface of the fabric
6. Allow fabric to air dry.

VIVI

NON-PERFORMANCE FABRIC

C A R E G U I D E

Professional dry cleaning is recommended. Clean with pure solvents that are petroleum distillate-based products. Please note caution in use of water-based or detergent-based solvent cleaners may cause excessive shrinkage. Water stains may become permanent.

It is recommended to periodically lightly brush or vacuum fabric to remove dust particle buildup.

LUXE-VELVET

NON-PERFORMANCE FABRIC

C A R E G U I D E

Clean this product with pure solvents (petroleum distillate-based products, i.e. Energine, Carbona, Renuzit), or similar products. Use in a well-ventilated room. Cleaning by a professional cleaning service ONLY is recommended.

CAUTION : Use of water-based or detergent-based solvent cleaners may cause excessive shrinking. Water stains may become permanent and unable to be removed with solvent cleaning agents. Avoid products containing Carbon Tetrachloride as it is highly toxic.

To prevent overall soil, frequent vacuuming or light brushing to remove dust and grime is recommended.
